

## PROBLEM:

This is a problem from Problem Set #9 of Fall 2000. Try working it first before checking the answer.

If the input x(t) and the impulse response h(t) of an LTI system are the following:

- (a) Determine y(0), the value of the output at t = 0.
- (b) Find all the values of t for which the outpout y(t) = 0. Note: You do not need to find y(t) at any other values of t.

This system can be represented as
$$x'(t) = u(t) \qquad x(t) \qquad x(t)$$
Rearranging:
$$x'(t) \qquad x(t) \qquad x(t) \qquad x(t) \qquad y(t)$$

$$\delta(t) - 2\delta(t-t) + \delta(t-t) \qquad \frac{1}{2}$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$\delta(t) - 2\delta(t-t) + \delta(t-t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$\delta(t) - 2\delta(t-t) + \delta(t-t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$1 \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$

$$x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t) \qquad x'(t)$$
